

Achilles

DESERT HAWK CHT

COMMERCIAL HIGHWAY/ VAN TIRE

FEATURES & BENEFITS

Optimized Pitches of Blocks and Grooves

give great driving performance on both dry and wet road conditions.

The Design of Big Blocks

on shoulders plus specific central blocks ensures the stiffness of tread and prevents tread offset wear so that the mileage is longer and driving is more smooth and stable.

3D Lateral Grooves

improve wet road performance and ensure the stiffness of tread.

3D Geometric Trimming Design

on blocks' edges avoids the crimping effect during braking and makes the pressure to ground evenly distributed so that the area of tire touching ground is increased and grip is significantly improved.

ACHILLES DESERT HAWK CHT
