

# CROSSWIND HP<sup>010</sup> PLUS

HP tire with excellent handling performance, high mileage and low noise

## Excellent traction

The optimized profile and enlarged contact patch provide outstanding traction and grip performance.

## Silence and comfort

The symmetrical tread design ensures a quiet and comfortable ride. The pitch arrangement is optimized by using FEA (Finite Element Analysis) to lower the tread pattern noise level.

## Long mileage

High distribution carbon-black in the tread rubber improves treadwear. The footprint is optimized using BPT (Balanced Pressure Technology), which contributes to the 50,000 miles mileage warranty.
