

# CROSSWIND RUGGED TRAXX

## Superior Traction

Criss-crossed and angular block design provides strong traction on muddy and soft surfaces.

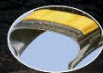

Rugged block design deals with all kinds of harsh terrain and climate

The open shoulder grooves and large void volume improves the evacuation of mud and snow under bad road conditions.

## Robust Durability

### Robustness and mileage

High strength carcass and cut-resistant compound prevent tread and sidewall from impact and scratches in rough terrain while providing high mileage.

### Excellent wet and snow braking

Tread design combined with improved compound and zig-zag siping for wet performance and snow traction.

### Dual sidewall Design

The sidewall protection effectively resists cutting and tearing. The unique dual sidewall design enables you to choose the side that best fits your vehicle.
